

REVISED DATE: 6/11/2010

A SPECIAL NOTE:

Due to FCC regulations, mass e-mail may not be sent to mobile devices without consent by the recipient. This issue has stopped many of our constituents from receiving the *Pastor's Weekly Briefing*, *Shepherd's Covenant Encourager* and *Pastor to Pastor Alert* e-newsletters. In addition to the addresses that must be blocked according to FCC regulations, our e-mail distribution service, SilverPop, automatically blocks several other addresses that have experienced repeated problems in delivery.

Below are listed the domains (the name after the @ sign) and e-mail prefixes (the name before the @ sign) that are being automatically suppressed from our mailings. If your domain shows up in this list or you have recently added mobile service to your Internet account, please make sure you authorize the receipt of e-mail from our sending domain — mail-family.org — with your service. It would also be wise to add the sending e-mail address we use — family@mail-family.org — to your personal address book, as its presence may also be used by your e-mail provider as authorization to deliver messages. Thank you.

RESTRICTED DOMAINS:

These are active domains that are blocked according to best practice and legislative compliance:
